ACRONYMS or DEFINITIONS

n/a

PURPOSE

To define applicable procedure codes of medically necessary criteria for the use of telemedicine in accordance with Versant Health requirements.

POLICY

A. BACKGROUND

The term telemedicine references real time audio/video communication between and among patients and doctors, store and forward technologies and remote monitoring devices. These technologies, where medical necessity has been established, improve outcomes through early detection, increase access to care, and reduce costs. Versant Health supports telemedicine, while strictly overseeing all aspects of safety, privacy, security and professional practices. Quality requirements include ongoing measurement of telemedicine outcomes to validate that telemedicine technologies alone, or in coordination with usual care maintain similar or better outcomes than usual care alone.

The delivery and medical necessity of telemedicine services varies by jurisdiction of both the patient and the provider.¹ A few states consider audio only services and recorded visits as equivalent to in person care while the majority of states require synchronous, full audio and video services.

B. Mandatory telemedicine requirements

- 1. The technology must authenticate the facility, if applicable, location and identity of the requesting patient.
- 2. The technology must disclose and validate the identity and appropriate training of professional rendering care.
- 3. Appropriate informed consent must be obtained referencing the advantages, limitations, and alternatives of these technologies.
- 4. The patient must have access to the record documenting the care received.
- 5. The professional providing care must be appropriately licensed and the telemedicine services approved by the authority issuing the professional license and the jurisdiction in which the patient lives.
- 6. The licensed professional providing telemedicine services supervises any unlicensed staff involved in patient care.
- 7. The physician must have liability insurance specifically including the provision of telemedicine services.
- 8. The telemedicine services follow the same standards of care as in person care.
- 9. Telemedicine encounters include modalities supported by the American Telemedicine Association consistent with applicable state and federal regulations.

C. Scenarios when telemedicine services are not separately reimbursable

- 1. The services occur the same day as a face-to-face encounter
- 2. The services are comprised only of audio technology (telephone) without interactive real time video technology, except as allowed per state and federal regulations.
- 3. The services are comprised of text messaging without real time interactive audio and visual components
- 4. The services comprise incidental support of face to face encounters.
- 5. The services comprise routine administrative matters, such as appointments, prescription renewals, authorization updates, scheduling issues, etc.
- 6. The services are performed within the global period of a surgery and are related to that event.

D. Documentation

Medical necessity must be supported by adequate and complete documentation in the patient's medical record that describes the procedure and the medical rationale for it as in Section B. above. All items must be available upon request to initiate or sustain previous payments. For retrospective reviews the medical care plan is required.

¹ Center for Connected Health Policy, 2024

Every page of the record must be legible and include appropriate patient identification information (e.g., complete name, date(s) of service). Services provided/ordered must be authenticated by the physician, in a handwritten or electronic signature. Stamped signatures are not acceptable.

E. Procedural Detail

Γ

CPT Cod	les for Synchronous Telemedicine Services
0378T	Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated data transmitted to a remote surveillance center for up to 30 days, review, and interpretation with report by a physician or other qualified health care professional
0379T	Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated data transmitted to a remote surveillance center for up to 30 days; technical support and patient instructions, surveillance, analysis, and transmission of daily and emergent data reports as prescribed by a physician or other qualified health care professional
92002	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; intermediate, new patient
92004	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; comprehensive, new patient, one or more visits
92012	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; intermediate, established patient
92014	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; comprehensive, established patient, one or more visits
96116	Neurobehavioral status exam (clinical assessment of thinking, reasoning and judgment, [e.g., acquired knowledge, attention, language, memory, planning and problem solving, and visual spatial abilities]), by physician or other qualified health care professional, both face-to-face time with the patient and time interpreting test results and preparing the report; first hour.
98000	Synchronous audio-video visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using total time on the date of the encounter for code selection, 15 minutes must be met or exceeded.
98001	Synchronous audio-video visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and low medical decision making. When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.
98002	Synchronous audio-video visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and moderate medical decision making. When using total time on the date of the encounter for code selection, 45 minutes must be met or exceeded.
98003	Synchronous audio-video visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and

	high medical decision making. When using total time on the date of the encounter for code selection, 60 minutes must be met or exceeded.
98004	Synchronous audio-video visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using total time on the date of the encounter for code selection, 10 minutes must be met or exceeded.
98005	Synchronous audio-video visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low medical decision making. When using total time on the date of the encounter for code selection, 20 minutes must be met or exceeded.
98006	Synchronous audio-video visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate medical decision making. When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.
98007	Synchronous audio-video visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and high medical decision making. When using total time on the date of the encounter for code selection, 40 minutes must be met or exceeded.
98008	Synchronous audio-only visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, straightforward medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 15 minutes must be met or exceeded.
98009	Synchronous audio-only visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, low medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.
98010	Synchronous audio-only visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, moderate medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 45 minutes must be met or exceeded.
98011	Synchronous audio-only visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, high medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 60 minutes must be met or exceeded.
98012	Synchronous audio-only visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, straightforward medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 10 minutes must be exceeded.
98013	Synchronous audio-only visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, low medical decision making, and more than 10 minutes of

	medical discussion. When using total time on the date of the encounter for code selection, 20 minutes must be met or exceeded.
98014	Synchronous audio-only visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, moderate medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.
98015	Synchronous audio-only visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, high medical decision making, and more than 10 minutes of medical discussion. When using total time on the date of the encounter for code selection, 40 minutes must be met or exceeded.
98016	Brief communication technology-based service (eg, virtual check-in) by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related evaluation and management service provided within the previous 7 days nor leading to an evaluation and management service or procedure within the next 24 hours or soonest available appointment, 5-10 minutes of medical discussion.
99202	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straight forward medical decision making. When using time for code selection, 15-29 minutes of total time is spent on the date of the encounter.
99203	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using time for code selection, 30-44 minutes of total time is spent on the date of the encounter.
99204	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 45-59 minutes of total time is spent on the date of the encounter.
99205	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and high level of medical decision making. When using time for code selection, 60-74 minutes of total time is spent on the date of the encounter.
99211	Neurobehavioral status exam (clinical assessment of thinking, reasoning and judgment
99212	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using time for code selection, 10-19 minutes of total time is spent on the date of the encounter.
99213	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using time for code selection, 20-29 minutes of total time is spent on the date of the encounter.
99214	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or

 examination and moderate level of medical decision making. When using time for code selection, 30-39 minutes of total time is spent on the date of the encounter. 99215 Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and high level of medical decision making. When using time for code selection, 40-54 minutes of total time is spent on the date of the encounter. G2012	physician or other qualified health care professional who can report evaluation
	and management services, provided to an established patient.
00005	Payment for a telehealth distant site service furnished by a Rural Health Clinic
G2025	(RHC) or Federally Qualified Health Center (FQHC) only
	Prolonged office or other outpatient evaluation and management service(s)
G2212	beyond the maximum required time of the primary procedure which has been
	selected using total time on the date of the primary service; each additional 15
	minutes.
	Routine ophthalmological examination including refraction; new patient
S0620	
	Routine ophthalmological examination including refraction; established patient
S0621	
	Clinic visit/encounter, all-inclusive; for use by federal access sites, CAH,
T1015	FQHC, RHC.
	Telehealth originating site facility fee with place of service Physician or
Q3014	practitioner's office; Hospital; Critical access hospital; Rural health clinic;
	Federally qualified health center; Community mental health center; Skilled
	nursing facility; renal dialysis center.
CPT Code	s for Asynchronous Telemedicine Services
	Demote imaging for detection of ratingly diagona (a.g., rating nothy in a patient
00007	Remote imaging for detection of retinal disease (e.g., retinopathy in a patient
92227	with diabetes) with analysis and report under physician supervision, unilateral
	or bilateral
00000	Remote imaging for monitoring and management of active retinal disease
92228	(e.g., diabetic retinopathy) with physician review, interpretation, and report,
	unilateral or bilateral
	Imaging of retina for detection or monitoring of disease; point-of-care
92229	automated analysis and report, unilateral or bilateral
	Online digital evaluation and management service, for an established patient,
99421	for up to 7 days, cumulative time during the 7 days; 5-10 minutes
	Online digital evaluation and management service, for an established patient,
99422	for up to 7 days, cumulative time during the 7 days; 11-20 minutes
	Online digital evaluation and management service, for an established patient,
99423	for up to 7 days, cumulative time during the 7 days; 21 or more minutes
	Interprofessional telephone/internet/electronic health record assessment and
99451	management service provided by a consultative physician, including a written

	report to the patient's treating/requesting physician, 5 minutes or more of medical consultative time.
99452	Interprofessional telephone/internet/electronic health record referral service(s) provided by a treating/requesting physician or other qualified health care professional, 30 minutes.
G2010	Remote evaluation of recorded video and/or images submitted by an established patient (e.g., store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment

Modifiers (valid per applicable state or federal regulations)		
FR	Supervising practitioner present through two-way, audio and video communication.	
GT	Via interactive audio and video telecommunication systems. Modifier GT is only for use with those services provided via synchronous telemedicine for which modifier 95 cannot be used.	
GQ	Via an asynchronous telecommunications system. Medical care provided by images and video that was not provided in real-time	
GY	Notice of Liability Not Issued, Not Required Under Payer Policy. Used to report that an Advanced Beneficiary Notice (ABN) was not issued because item or service is statutorily excluded or does not meet definition of any Medicare benefit.	
95*	Synchronous telemedicine service rendered via real-time interactive audio and video telecommunication system.	
Place	e of Service ²	
02	Telehealth provided other than in patient's home	
10	Telehealth provided in patient's home	
11	Office	
22	On campus outpatient hospital	
The use of specific modifier and place of service combinations, defined by state Medicaid or managed care programs, are to be followed when submitting claims to Versant Health. Telehealth coverage and the required coding should be verified with all carriers.		

DISCLAIMER and COPYRIGHTS

This clinical policy is provided for information purposes only and does not constitute medical advice. Versant Health, Inc., and its affiliates (the "Company") do not provide health care services and cannot guarantee any results or outcomes. Treating doctors are solely responsible for determining what services or treatments to provide to their patients. Patients (members) should always consult their doctor before making any decisions about medical care.

² CCHP – see sources

Subject to applicable law, compliance with this clinical policy is not a guarantee of coverage or payment. Coverage is based on the terms of an individual's particular benefit plan document, which may not cover the service(s) or procedure(s) addressed in this clinical policy. The terms of the individual's specific benefit plan are always determinative.

Every effort has been made to ensure that the information in this clinical policy is accurate and complete, however the Company does not guarantee that there are no errors in this policy or that the display of this file on a website is without error. The company and its employees are not liable for any errors, omissions, or other inaccuracies in the information, product, or processes disclosed herein. Neither the Company nor the employees represent that use of such information, products, or processes will infringe on privately owned rights. In no event shall the Company be liable for direct, indirect, special, incidental, or consequential damages arising out of the use of such information, product, or processe.

COMPANY'S COPYRIGHT STATEMENT Except for any copyrights described below, this clinical policy is confidential and proprietary, and no part of this clinical policy may be copied or distributed without Versant Health, or its applicable affiliates, express prior written approval.
