<b>ACRONYMS or DEFINITIONS</b>	
n/a	

<b>PURPOSE</b>
----------------

To define applicable procedure codes of medically necessary criteria for the use of telemedicine in accordance with Versant Health requirements.

<b>POLICY</b>
---------------

**A. BACKGROUND**

The term telemedicine references real time audio/video communication between and among patients and doctors, store and forward technologies and remote monitoring devices. These technologies, where medical necessity has been established, improve outcomes through early detection, increase access to care, and reduce costs. Versant Health supports telemedicine, while strictly overseeing all aspects of safety, privacy, security and professional practices. Quality requirements include ongoing measurement of telemedicine outcomes to validate that telemedicine technologies alone, or in coordination with usual care maintain similar or better outcomes than usual care alone.

## **B. Mandatory telemedicine requirements**

1. The technology must authenticate the facility, if applicable, location and identity of the requesting patient.
2. The technology must disclose and validate the identity and appropriate training of professional rendering care.
3. Appropriate informed consent must be obtained referencing the advantages, limitations, and alternatives of these technologies.
4. The patient must have access to the record documenting the care received
5. The professional providing care must be appropriately licensed and the telemedicine services must be approved by both the authority issuing the professional license and the jurisdiction in which the patient is resident.
6. The licensed professional providing telemedicine services is responsible for the supervision of any non-physicians involved in patient care.
7. The physician must have liability insurance specifically including the provision of telemedicine services.
8. The telemedicine services rendered follow the same standard of care protocols
9. Telemedicine encounters include modalities supported by the American Telemedicine Association consistent with state and federal regulations.

## **C. Scenarios when telemedicine services are not separately reimbursable**

1. They occur the same day as a face-to-face encounter
2. They are comprised only of audio technology (telephone) without interactive real time video technology (except as allowed per state and federal regulations).
3. They are comprised of text messaging without real time interactive audio and visual components
4. They comprise incidental support to face to face encounters
5. They comprise routine administrative matters, such as, but not limited to, appointments, prescription renewals, authorization updates, scheduling issues, etc.
6. They are performed within the global period of a surgery and are related to that event

## **D. Documentation**

Medical necessity must be supported by adequate and complete documentation in the patient's medical record that describes the procedure and the medical rationale for it as in Section B. above. All items must be available upon request to initiate or sustain previous payments. For retrospective reviews the operative report and medical care plan is required.

Every page of the record must be legible and include appropriate patient identification information (e.g., complete name, date(s) of service). Services provided/ordered must be authenticated by the physician, in a handwritten or electronic signature. Stamped signatures are not acceptable.

**E. Procedural Detail**

<b>CPT Codes for Synchronous Telemedicine Services</b>	
0378T	Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated data transmitted to a remote surveillance center for up to 30 days, review, and interpretation with report by a physician or other qualified health care professional
0379T	Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated data transmitted to a remote surveillance center for up to 30 days; technical support and patient instructions, surveillance, analysis, and transmission of daily and emergent data reports as prescribed by a physician or other qualified health care professional
92002	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; intermediate, new patient
92004	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; comprehensive, new patient, one or more visits
92012	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; intermediate, established patient
92014	Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; comprehensive, established patient, one or more visits
96116	Neurobehavioral status exam (clinical assessment of thinking, reasoning and judgment, [e.g., acquired knowledge, attention, language, memory, planning and problem solving, and visual spatial abilities]), by physician or other qualified health care professional, both face-to-face time with the patient and time interpreting test results and preparing the report; first hour.
99202	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straight forward medical decision making. When using time for code selection, 15-29 minutes of total time is spent on the date of the encounter.
99203	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using time for code selection, 30-44 minutes of total time is spent on the date of the encounter.
99204	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 45-59 minutes of total time is spent on the date of the encounter.
99205	Office or other outpatient visit for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and high level of medical decision making. When using time for code selection, 60-74 minutes of total time is spent on the date of the encounter.

99211	Neurobehavioral status exam (clinical assessment of thinking, reasoning and judgment)
99212	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using time for code selection, 10-19 minutes of total time is spent on the date of the encounter.
99213	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using time for code selection, 20-29 minutes of total time is spent on the date of the encounter.
99214	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 30-39 minutes of total time is spent on the date of the encounter.
99215	Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and high level of medical decision making. When using time for code selection, 40-54 minutes of total time is spent on the date of the encounter.
99231	Subsequent hospital visit, 15 minutes - limited to one telehealth every 3 days per CMS
99232	Subsequent hospital visit, 25 minutes – limited to one telehealth every 3 days per CMS
99233	Subsequent hospital visit, 35 minutes – limited to one telehealth every 3 days per CMS
99307	Subsequent nursing home visit, 10 minutes – limited to one telehealth every 30 days per CMS
99308	Subsequent nursing home visit, 15 minutes – limited to one telehealth every 30 days per CMS
99309	Subsequent nursing home visit, 25 minutes – limited to one telehealth every 30 days per CMS
99310	Subsequent nursing home visit, 35 minutes – limited to one telehealth every 30 days.
99334	Domiciliary or rest home visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components. . .
99335	Domiciliary or rest home visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components. . .
99347	Home visit for the evaluation and management of an established patient . . .
99348	Home visit for the evaluation and management of an established patient. . .
99354	Prolonged service(s) in the outpatient setting requiring direct patient contact beyond the time of the usual service . . .
99355	Prolonged service(s) in the outpatient setting requiring direct patient contact beyond the time of the usual service; each additional 30 minutes

99356	Prolonged service in the inpatient or observation setting, requiring unit/floor time beyond the usual service; first hour (List separately in addition to code for inpatient or observation)
99357	Prolonged service in the inpatient or observation setting, requiring unit/floor time beyond the usual service; each additional 30 minutes
99407	Smoking and tobacco use cessation counseling visit; intensive, greater than 10 minutes
99421	Online digital evaluation and management service, for an established patient, for up to 7 days, cumulative time during the 7 days; 5-10 minutes
99422	Online digital evaluation and management service, for an established patient, for up to 7 days, cumulative time during the 7 days; 11-20 minutes
99423	Online digital evaluation and management service, for an established patient, for up to 7 days, cumulative time during the 7 days; 21 or more minutes
G0108	Diabetes outpatient self-management training services, individual, per 30 minutes
G0109	Diabetes outpatient self-management training services, group session (two or more), per 30 minutes
G0513	Prolonged preventive service(s) (beyond the typical service time of the primary procedure), in the office or other outpatient setting requiring direct patient contact beyond the usual service; first 30 minutes
G0514	Prolonged preventive service(s) (beyond the typical service time of the primary procedure), in the office or other outpatient setting requiring direct patient contact beyond the usual service; first 30 minutes
G2012	Brief communication technology-based service, e.g., virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, . . .
G2025	Payment for a telehealth distant site service furnished by a Rural Health Clinic (RHC) or Federally Qualified Health Center (FQHC) only
G2212	Prolonged office or other outpatient evaluation and management service(s) beyond the maximum required time of the primary procedure which has been selected using total time on the date of the primary service; each additional 15 minutes . . .
S0620	Routine ophthalmological examination including refraction; new patient
S0621	Routine ophthalmological examination including refraction; established patient
T1015	Clinic visit/encounter, all-inclusive; for use by federal access sites, CAH, FQHC, RHC.
Q3014	Telehealth originating site facility fee with place of service Physician or practitioner's office; Hospital; Critical access hospital; Rural health clinic; Federally qualified health center; Community mental health center; Skilled nursing facility; renal dialysis center.

**CPT Codes for Asynchronous Telemedicine Services**

92227	Remote imaging for detection of retinal disease (e.g., retinopathy in a patient with diabetes) with analysis and report under physician supervision, unilateral or bilateral
92228	Remote imaging for monitoring and management of active retinal disease (e.g., diabetic retinopathy) with physician review, interpretation, and report, unilateral or bilateral
92229	Imaging of retina for detection or monitoring of disease; point-of-care automated analysis and report, unilateral or bilateral
99421	Online digital evaluation and management service, for an established patient, for up to 7 days, cumulative time during the 7 days; 5-10 minutes
99422	Online digital evaluation and management service, for an established patient, for up to 7 days, cumulative time during the 7 days; 11-20 minutes
99423	Online digital evaluation and management service, for an established patient, for up to 7 days, cumulative time during the 7 days; 21 or more minutes
99451	Interprofessional telephone/internet/electronic health record assessment and management service provided by a consultative physician, including a written report to the patient's treating/requesting physician, 5 minutes or more of medical consultative time.
99452	Interprofessional telephone/internet/electronic health record referral service(s) provided by a treating/requesting physician or other qualified health care professional, 30 minutes.
G2010	Remote evaluation of recorded video and/or images submitted by an established patient (e.g., store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment

<b>Modifiers</b>	
FR	Supervising practitioner present through two-way, audio and video communication.
GT	Via interactive audio and video telecommunication systems. Modifier GT is only for use with those services provided via synchronous telemedicine for which modifier 95 cannot be used.
GQ	Via an asynchronous telecommunications system. Medical care provided by images and video that was not provided in real-time
GY	Notice of Liability Not Issued, Not Required Under Payer Policy. Used to report that an Advanced Beneficiary Notice (ABN) was not issued because item or service is statutorily excluded or does not meet definition of any Medicare benefit.
95*	Synchronous telemedicine service rendered via real-time interactive audio and video telecommunication system.
<b>Place of Service</b>	
02	Telehealth provided other than in patient's home
10	Telehealth provided in patient's home
11	Office

22	On campus outpatient hospital
The use of specific modifier and place of service combinations, defined by state Medicaid or managed care programs, are to be followed when submitting claims to Versant Health. Telehealth coverage and the required coding should be verified with all carriers.	

<b>DISCLAIMER and COPYRIGHTS</b>
----------------------------------

This clinical policy is provided for information purposes only and does not constitute medical advice. Versant Health, Inc., and its affiliates (the “Company”) do not provide health care services and cannot guarantee any results or outcomes. Treating doctors are solely responsible for determining what services or treatments to provide to their patients. Patients (members) should always consult their doctor before making any decisions about medical care.

Subject to applicable law, compliance with this clinical policy is not a guarantee of coverage or payment. Coverage is based on the terms of an individual’s particular benefit plan document, which may not cover the service(s) or procedure(s) addressed in this clinical policy. The terms of the individual’s specific benefit plan are always determinative. Every effort has been made to ensure that the information in this clinical policy is accurate and complete, however the Company does not guarantee that there are no errors in this policy or that the display of this file on a website is without error. The company and its employees are not liable for any errors, omissions, or other inaccuracies in the information, product, or processes disclosed herein. Neither the Company nor the employees represent that use of such information, products, or processes will infringe on privately owned rights. In no event shall the Company be liable for direct, indirect, special, incidental, or consequential damages arising out of the use of such information, product, or process.

**COMPANY’S COPYRIGHT STATEMENT**

Except for any copyrights described below, this clinical policy is confidential and proprietary, and no part of this clinical policy may be copied without Versant Health, or its applicable affiliates, expressing prior written approval.
