5%
experience
neck and
shoulder pain

8.8%
experience
headaches

9.1%
experience
dry, irritated
eyes

15.2%
experience
a reduced
attention span

27.9%
experience
blurred vision

Tips to avoid digital eye strain:

The Vision Council recommends individuals and their child(ren) visit an eyecare provider to discuss their digital habits and what solutions are available to relieve the symptoms of digital eye strain.

- Be sure to get an annual eye exam to see if the eye strain is from digital devices and whether you need new prescriptions glasses or lenses.
- Take frequent breaks from using digital devices
- Reducing overhead lighting to eliminate screen glare
- Positioning yourself at arm's distance away from the screen
- Increasing text size on devices to make the screen more readable
- Blink more and look away from the screen every 20 minutes
