

Eyewear formulary for Versant Health members

Versant Health is pleased to present the formulary associated with its eyewear dispensing program.

As part of our vision to make Davis Vision and Superior Vision the most trusted vision plans for eye care professionals, Versant Health has undertaken a number of operational enhancements, including investments in operations, call center services, and streamlined payment technology.

Our eyewear dispensing program, which includes the following formulary and a state-of-the-art eye care professional portal, is among our most exciting enhancements!

We have entered in to an agreement with Essilor to fulfill lab orders using its nation-wide laboratory network. You will now dispense eyewear orders from a catalogue featuring innovative products from Essilor, Shamir, and Kodak. You will see that the formulary includes a wide array of high quality eyewear using advanced technology and broad choice in lens functionality.

Essilor is the largest eyewear manufacturer in the world with a nation-wide network of labs. Through this agreement, we are able to offer you and your patients:

- a large variety of lenses, including the most utilized and requested digital progressives, antireflective coatings, and blue light protection,
- access to innovative products as a result of Essilor's industry-leading research and development investments,
- a network of labs across the country, which can improve turnaround time on orders and
- cost stabilization due to the purchasing power Versant Health's 37 million members give us.

We look forward to continued service to you and your patients.

Please see the back page for the updated eyewear formulary.

Brought to you by  **VersantHealth®**
