Children's Vision Tips

In the U.S., 1 in every 4 children has a vision disorder that requires diagnosis and treatment by an eye doctor.¹

Signs of Eye Problems in Children²

- Discomfort or itchiness
- Seeing spots in vision
- Dilated eyes/large pupils
- Spots on the white of the eye
- Blinking or rubbing
- Crust or goop in eyes
- Misaligned eyes
- Head tilting or covering one eye

In School-Age Children, Other Signs to Watch for Include...³

- Quick loss of interest in activities that require eye use
- Losing their place when reading
- Turning the head to look at something in front of them

Common Eye Problems⁴

- Amblyopia: Lazy eye
- Strabismus: A misalignment of the eyes causing one or both to turn in, out, up, or down
- Refractive errors: Nearsightedness, farsightedness, or astigmatism

Help Protect Your Child's Eyes

- Schedule routine eye exams⁵

- Limit screen time to avoid digital eye strain⁵

- Encourage a healthy lifestyle that includes a balanced diet and exercise⁵

- Buy age-appropriate eyeglasses (plastic frames, shatterproof lenses, etc.). Ask an eye care professional for recommendations.⁵

- Purchase protective eye goggles and shields to avoid sports injuries⁵
